# S&P 500 vs STYRINGSFAKTORER

## RIP bullish sentiment

2022 is the first year in the history of the AAI Sentiment survey that bullish sentiment was below its historical average in every week of the year.

Wonder where SPX will be when we get the first above-average reading....?

Number of Weeks With Above Average Bullish Sentiment in AAI Survey

# S&P 500 - DAG PERSPEKTIV - HØYERE BUNN & OPPTREND?

If....  
Goldman channeling their inner Kipling:

"Unknown unknowns" are by definition impossible to predict. But if...

...we do not experience another black swan event in 2023, and  
...the US achieves an economic soft landing, and

...the Fed stops raising rates while inflation recedes, and

...China's bumpy reopening transitions back to stable growth, and

...Europe successfully transitions its economy further away from a dependence on Russian gas, and

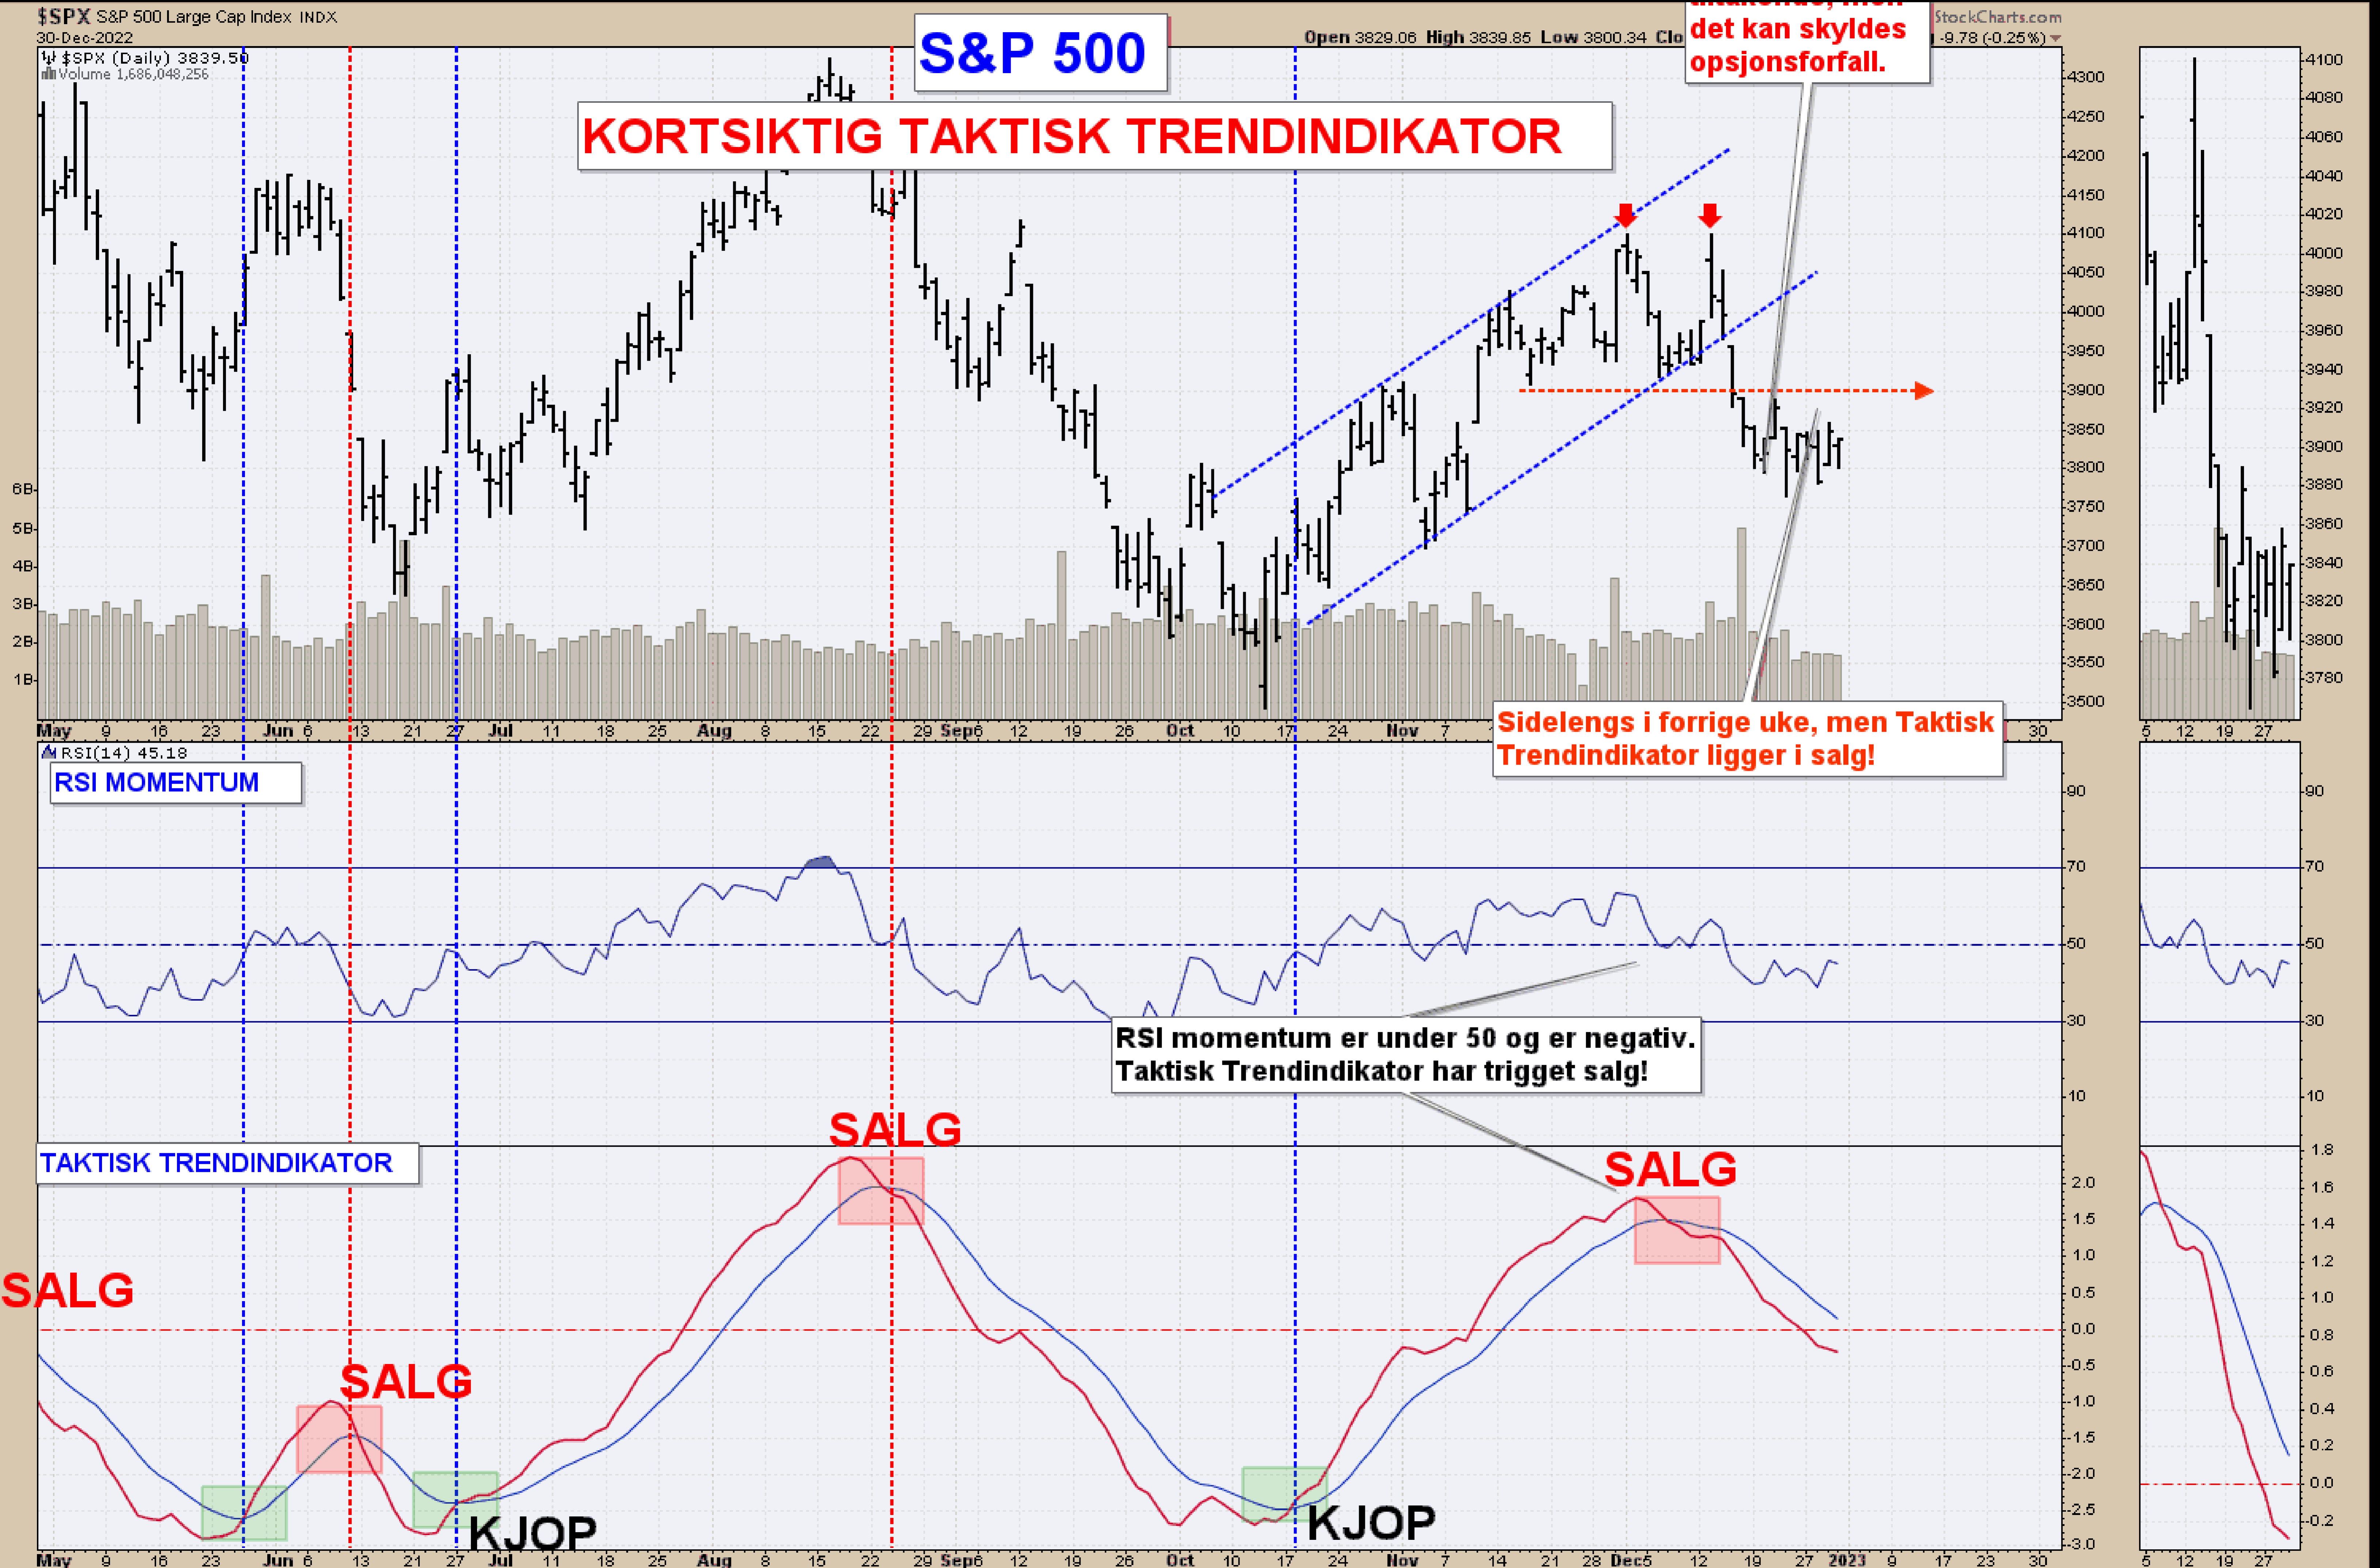

...the US consumer remains more resilient than many expect....

...then, the S&P 500 may just be able to eke out a flat performance amidst still-elevated volatility...."
