Sell rallies

The Trump Pivot is not an all-clear given:
1. tariff uncertainty remains with the near-term potential for escalation

2. the market will need to see 1-2 deals done with a G8 country with Japan and UK the most likely

3. forward guidance remains a downside risk for earnings season despite the behavior surrounding DAL and WMT

4. we do not know if Mag7/MegaCap Tech can be a safety haven before/after they report earnings (JPM market intelligence)

Det er et meget lavt volum i Schibsted, men formasjonen som formes begynner å se bedre ut. Trenger å se mer volum. Forøvrig er det ikke noen nye signaler blant de store idag.

Det meste idag dreier seg om forsvar hvor SAAB leder an sektoren. KOG og Kitron henger seg på med nye kjøpssignaler. Spørsmålet er om det er verdt risken å ta de i forkant av påsken ettersom Wall Street har åpnet onsdag, torsdag og mandag.

SATS tester ny all-time-high og vil utløse et nytt kjøpssignal ved passering av 35,25, kursmål 37,40. Har nettopp gått gjennom en fin konsolidering og ser potent ut. Kommenterer ikke flere på small-caps listen da det fortsatt er geopolitisk risk og vi vet ikke hvilket marked vi returnerer til på tirsdag.

SELSKAPSKOMMENTARER

Schibsted har falt 120 kroner fra toppen og det tekniske begynner å stramme seg til. Vi har tre bunner her nede hvorav den siste ble en dobbel-bunn. Kursen har klart å feste seg over både 8 og 20 dager og tester 50 dager motstanden idag. Samtidig som den også tester brudd ut av den kortsiktige nedtrenden.

Volumvektet snitt kommer ikke spill før 331 slik at det tekniske indikerer at det er kortsiktige muligheter. Den er blitt solgt ned de to tidligere gangene den har vært her oppe i mars/april slik at vi får se om det fortsatt er større selgere på disse nivåene. Har utløst et objektivt kjøpssignal ved 305, kursmålet er litt vel optimistisk og 372. Volumene er nå lave, det er snart påske, stenger 13:10 imorgen og trenger å se at den slutter her oppe på et mer tiltakende volum.

Teknisk sett skal vi ha et våkent blikk på aksjen og gjennom de to forrige toppene ved 311,20 og vi har en endring av mønster. Følg Schibsted og kommer det inn et volum over 50 dager snittet kombinert med brudd opp er aksjen et kjøp.

GOD PÅSKE

Dette blir siste utgave denne uken da Oslo Børs stenger 13:10 imorgen, men er det noe helt spesielt sender jeg selvfølgelig ut en ekstra mail.

Vil også følge opp Wall Street denne påsken og sender ut kommentarer gitt noe spesielt inntreffer.

Da ønsker jeg dere alle en riktig hyggelig påske.
